ENVIRON'S IONZYME RANGE C-QUENCE EYE GEL

Environ®'s Ionzyme® C-Quence Eye Gel is a light gel formula containing three peptides, Argireline®, Matrixyl® and Dermaxyl™, which work in synergy with vitamins A, C and E to reduce the appearance of wrinkles around the eye area. It does not contain a sunscreen and must be used together with a sunscreen of SPF15 or higher.

The C-Quence Eye Gel effectively helps to reduce the depth of wrinkles and fine lines, thereby giving the skin a smoother appearance. Matrixyl® (Palmitoyl Pentapeptide-3) helps to stimulate the DNA of the fibroblasts in the skin to create collagen I and III and builds up more elastin fibres in the dermis. Dermaxyl™ (Palmitoyl Oligopeptide) assists in rehydrating the skin by improving the ceramide activity in the skin. It also assists in the prevention of DNA damage and the reduction of sun damaged cells. Dermaxyl™ also stimulates the production of elastin and collagen. Argireline® (Acetyl Hexapeptide-3) provides similar, but milder, relaxation of the facial muscles to that of Botulinum Toxin. These peptides work in synergy and form the full brigade of powerful antioxidants (vitamins A, C and E, Soybean and Rosemary extracts) to give firmer, smoother and healthier skin.

*Congratulations to our very own **Ella McLeod** for having won the highly contested 2011 Murray Bridge Outstanding Business Award for the Outstanding Individual Employee Under 25, and for being a finalist in the Outstanding Customer Service Award.*

Purchase either the Environ C-Quence 1, 2, 3 or 4, (the ultimate anti-ageing serum), enriched with vitamins A, C & E and anti-ageing peptides, you can then purchase the C-Quence Eye Gel at half price, save \$51.00! While stocks last.

Ladies, we kindly remind those of you with vouchers from Mother's Day 2011 that expiry dates are nearing... We encourage you to call us on (08) 8531 2255 as soon as possible to make an appointment and avoid any disappointment. We look forward to seeing you all!

TREATMENT OF MINOR SKIN IRREGULARITIES WITH THE *CLINICAL SKIN CLEAR*

This month, we see the introduction of the *Clinical Skin Clear*, a system expertly designed to remove minor skin irregularities, such as clogged pores, fibroma simplex, skin tags, hyperpigmented lesions, spider naevi, cholesterol deposits, milia, acne pimples and telangiectasis. This treatment, administered at *Raptcha'u* by Carolyn from *Proskin Clinic*, works non-invasively using combined radio and high frequency technologies; liquids attracted to heat are released via various sized probes to eradicate these unwanted irregularities. This process is quick and does not damage or harm surrounding tissue, with minimal discomfort and a short healing time, depending on the size and type of the tissue being treated. Costs are estimated at \$105 for red facial capillaries or multiple lesions, and \$50-\$150 for small to large individual spots.
